## Healing Techniques

All Natural Spiritual Energy Healing Techniques and Treatments are based upon electro-magnetic energy transference. The electrical wavelengths and magnetic currents of a healthy body, when super-energized, can be used to heal an injured or diseased weakened body. One with this super energized state of electro-magnetic energies, known as Enlightenment, is able to direct a constant flow and pure flow of highly charged electro-magnetic energy to heal injuries and disease.

All life is based upon the electrical wavelengths of Light and magnetic currents of Love. In physics, String Theorists, Quantum Mechanic adherents and Einsteinian physicists, all agree that the basic substance throughout our entire universe is comprised of electro-magnetic energies. In the Natural Healing Techniques, one heals others simply by being a pure conduit for the highest possible level of electro-magnetic energies.

The Natural Healing Techniques Healer's transference of highly charged electro-magnetic energies flows down to the cellular level using highly charged electro-magnetic energies to replace damaged cells with new cells. This process uses the ancient form of natural stem cell replacement, for when the proper level of charged electro-magnetic energies is combined with human DNA, stem cells are created. This same process is used by a healthy individual's body to constantly reproduce new cells for all parts of itself.

Special highly charged electro-magnetic energies are needed to create the billions of cells which each of our bodies needs each day to replace the billions of cells lost each day. The

electro-magnetic energies needed to create new cells comes a little from the food we consume and from the air which we breathe, however, most of the highly charged energies needed for cellular replacement come from the electro-magnetic energy fields which surround our temporary physical body. These electro-magnetic energy fields are our permanent body of Light, or Light Body.

Who we really are is a body of Light, or Light Body. We go into our Light Body at night when our physical body goes asleep and we dream. Our Light Body, which surrounds our physical body, is part of us which religion refers to as "Spirit". When our Light Bodies first began to experience incarnations into, or living within, human physical bodies, all humanity was completely connected consciously between their Light Bodies and their physical Bodies.

An individual who retained the pure electro-magnetic connections between their Light Body and their physical body was known as an Enlightened One. Individuals in the state of Enlightenment are able to consciously connect their Light Body and Physical body, and are able to heal others with a simple "laying on of the hands".

The SA RA method of going beyond Enlightenment and properly healing oneself and others, uses the MER, or Love and Light Energies of one's Conscious Awareness, to merge one's KA, (one's Light Body), with one's BA, (one's physical body).

### THE THREE STEPS TO ATTAIN ENLIGHTENMENT:

1. Activation and expansion of One's Earthly Spirit Light Body through the usage of spiritual techniques, such as the free Whole Brain Thinking Techniques at [www.christslight.org](http://www.christslight.org).
2. Balancing, Cleansing and Integrating Higher Dimensional Electro-magnetic Energies in One's Activated and Expanded Earthly Spirit Light Body using Advanced Forgiveness Techniques.
3. Teaching and Healing of Others so that the Golden Spheres, or Strings, of Electro-magnetic Energies Flow Through One's Body to Properly Help and Heal Others, a Process Which Also Expands One's Earthly Spirit Light Body.
